DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William B. Ritchie on March 7, 2007.

Regarding claim 1, lines 19 & 20, delete recited language: "then said anti-theft luggage rack can be locked into place on the two-wheel vehicle with said cylindrical lock and key"; and

replace with - - then said anti-theft luggage rack can be locked into place on the rectangular body which is attached to the said support rods on the two-wheeled vehicle with said cylindrical lock and key. - -

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: Claim 1 is deemed to be directed to a non-obvious improvement over the invention patented

numbers in Edelson (U.S. Patent Number 4258870, Shelhart (U.S. Patent Number 5251796) and Johnston (U.S. Patent Number 6029875).

The prior art of record discloses supporting rods that connect the luggage rack to the two-wheel vehicle; a rectangular body having supporting elements and connected to the supporting rods, wherein the supporting elements further comprise semicircular separated by respective tubes;

an upper rectangular bag attached to the supporting elements of the rectangular body wherein the upper rectangular bag;

two opposing rigidly supported vertical side saddlebags, wherein the opposing side saddlebags are also attached to the rectangular body;

a U-shaped rigid locking rod with a cylindrical lock and a key.

However, the prior art of record does not disclose the anti-theft luggage rack for two-wheel vehicles in combination with the upper rectangular bag and the opposing side saddlebags are attached to the supporting elements of the rectangular body via the U-shaped rigid rod by sliding the U-shape rigid rod through the semi-circular moldings; then the anti-theft luggage rack can be locked into place on the rectangular body which is attached to the said support rods on the two-wheeled vehicle with said cylindrical lock and key.

The primary reason for allowance of claim 1 is: the anti-theft luggage rack for two-wheeled vehicles having in combination of the supporting rods that connect the luggage rack to the two-wheeled vehicles, the rectangular body having supporting elements and connected to the supporting rods, wherein the supporting elements

further comprise semi-circular moldings separated by respective tubes, the upper rectangular bag attached to the supporting elements of the rectangular body wherein the upper rectangular bag also serves to cover a saddlebag locking arrangement, two opposing rigidly supported vertical side saddlebags, with each saddlebag having a rigid locking tubular handle, wherein the opposing side saddlebags are also attached to the rectangular body, the U-shaped rigid locking rod with a cylindrical lock and key providing the saddlebag locking arrangement, wherein the upper rectangular bag and the opposing side saddlebags are attached to the supporting elements of the rectangular body via the U-shaped rigid rod by sliding the U-shaped rigid rod through the semi-circular moldings, then the anti-theft luggage rack can be locked into place on the rectangular body which is attached to the said support rods on the two-wheeled vehicle with said cylindrical lock and key.

Therefore, the anti-theft luggage rack for two-wheeled vehicles in combination with the limitations set forth in claim 1 defines over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
